

AM-AIR ARIA™

Welcome to Am Air American Air Scrubbers Inc. Our flagship product, the Am-Air Aria™, is revolutionizing odor and microbial control with cutting-edge technology. Explore how our innovative solutions are setting new standards in air quality management for industries ranging from cannabis cultivation to medical waste facilities.

Odor & Microbial Control System

Transforming Air Quality Across Industries

INNOVATIVE TECHNOLOGY FOR
SUPERIOR AIR QUALITY

THE AM-AIR ARIA™ SYSTEM

Advanced Purification:

The Aria™ system neutralizes odor-causing molecules, eradicates airborne microbial contaminants, and eliminates insects and their pheromones without the need for filters, absorbents, or chemical sprays.

Efficient Design: Operating unobtrusively, the Aria™ system requires no special maintenance, filter replacement, or chemical additives, promoting continuous, cost-effective air purification.

Versatile Applications: From cannabis facilities and medical waste facilities to pet food production and hospitals, the Aria™ system excels in diverse settings, ensuring cleaner, safer environments.

THE SCIENCE BEHIND THE ARIA™ SYSTEM

The Aria™ system uses a photocatalytic process similar to solar panels. Semiconductor crystals release electrons when exposed to light, reacting with air pollutants on the catalyst plate to "clean" the air effectively.

KEY BENEFITS

- **Enhanced Air Quality:** Reduces or eliminates persistent odors, improving workplace environments and community relations.
- **VOC Mitigation:** Actively neutralizes volatile organic compounds, contributing to healthier living and working spaces.
- **Microbial & Insect Control:** Decreases airborne microbial contamination and insect presence, fostering healthier conditions in various settings.

DISTINCTIVE FEATURES

- No internal accumulation ensures continuous operation.
- High efficiency in air purification with unobtrusive, quiet performance.
- Eliminates odors, VOCs, and allergens without harmful chemicals.

APPLICATIONS ACROSS INDUSTRIES

- Cannabis Facilities
- Medical Waste Facilities
- Pet Food Production
- Spice Drying/Grinding
- Hospitals
- Animal Testing Laboratories
- Hospital Cafeterias
- Book Depositories
- High Occupancy Rooms
